

Roll a flower game instructions.

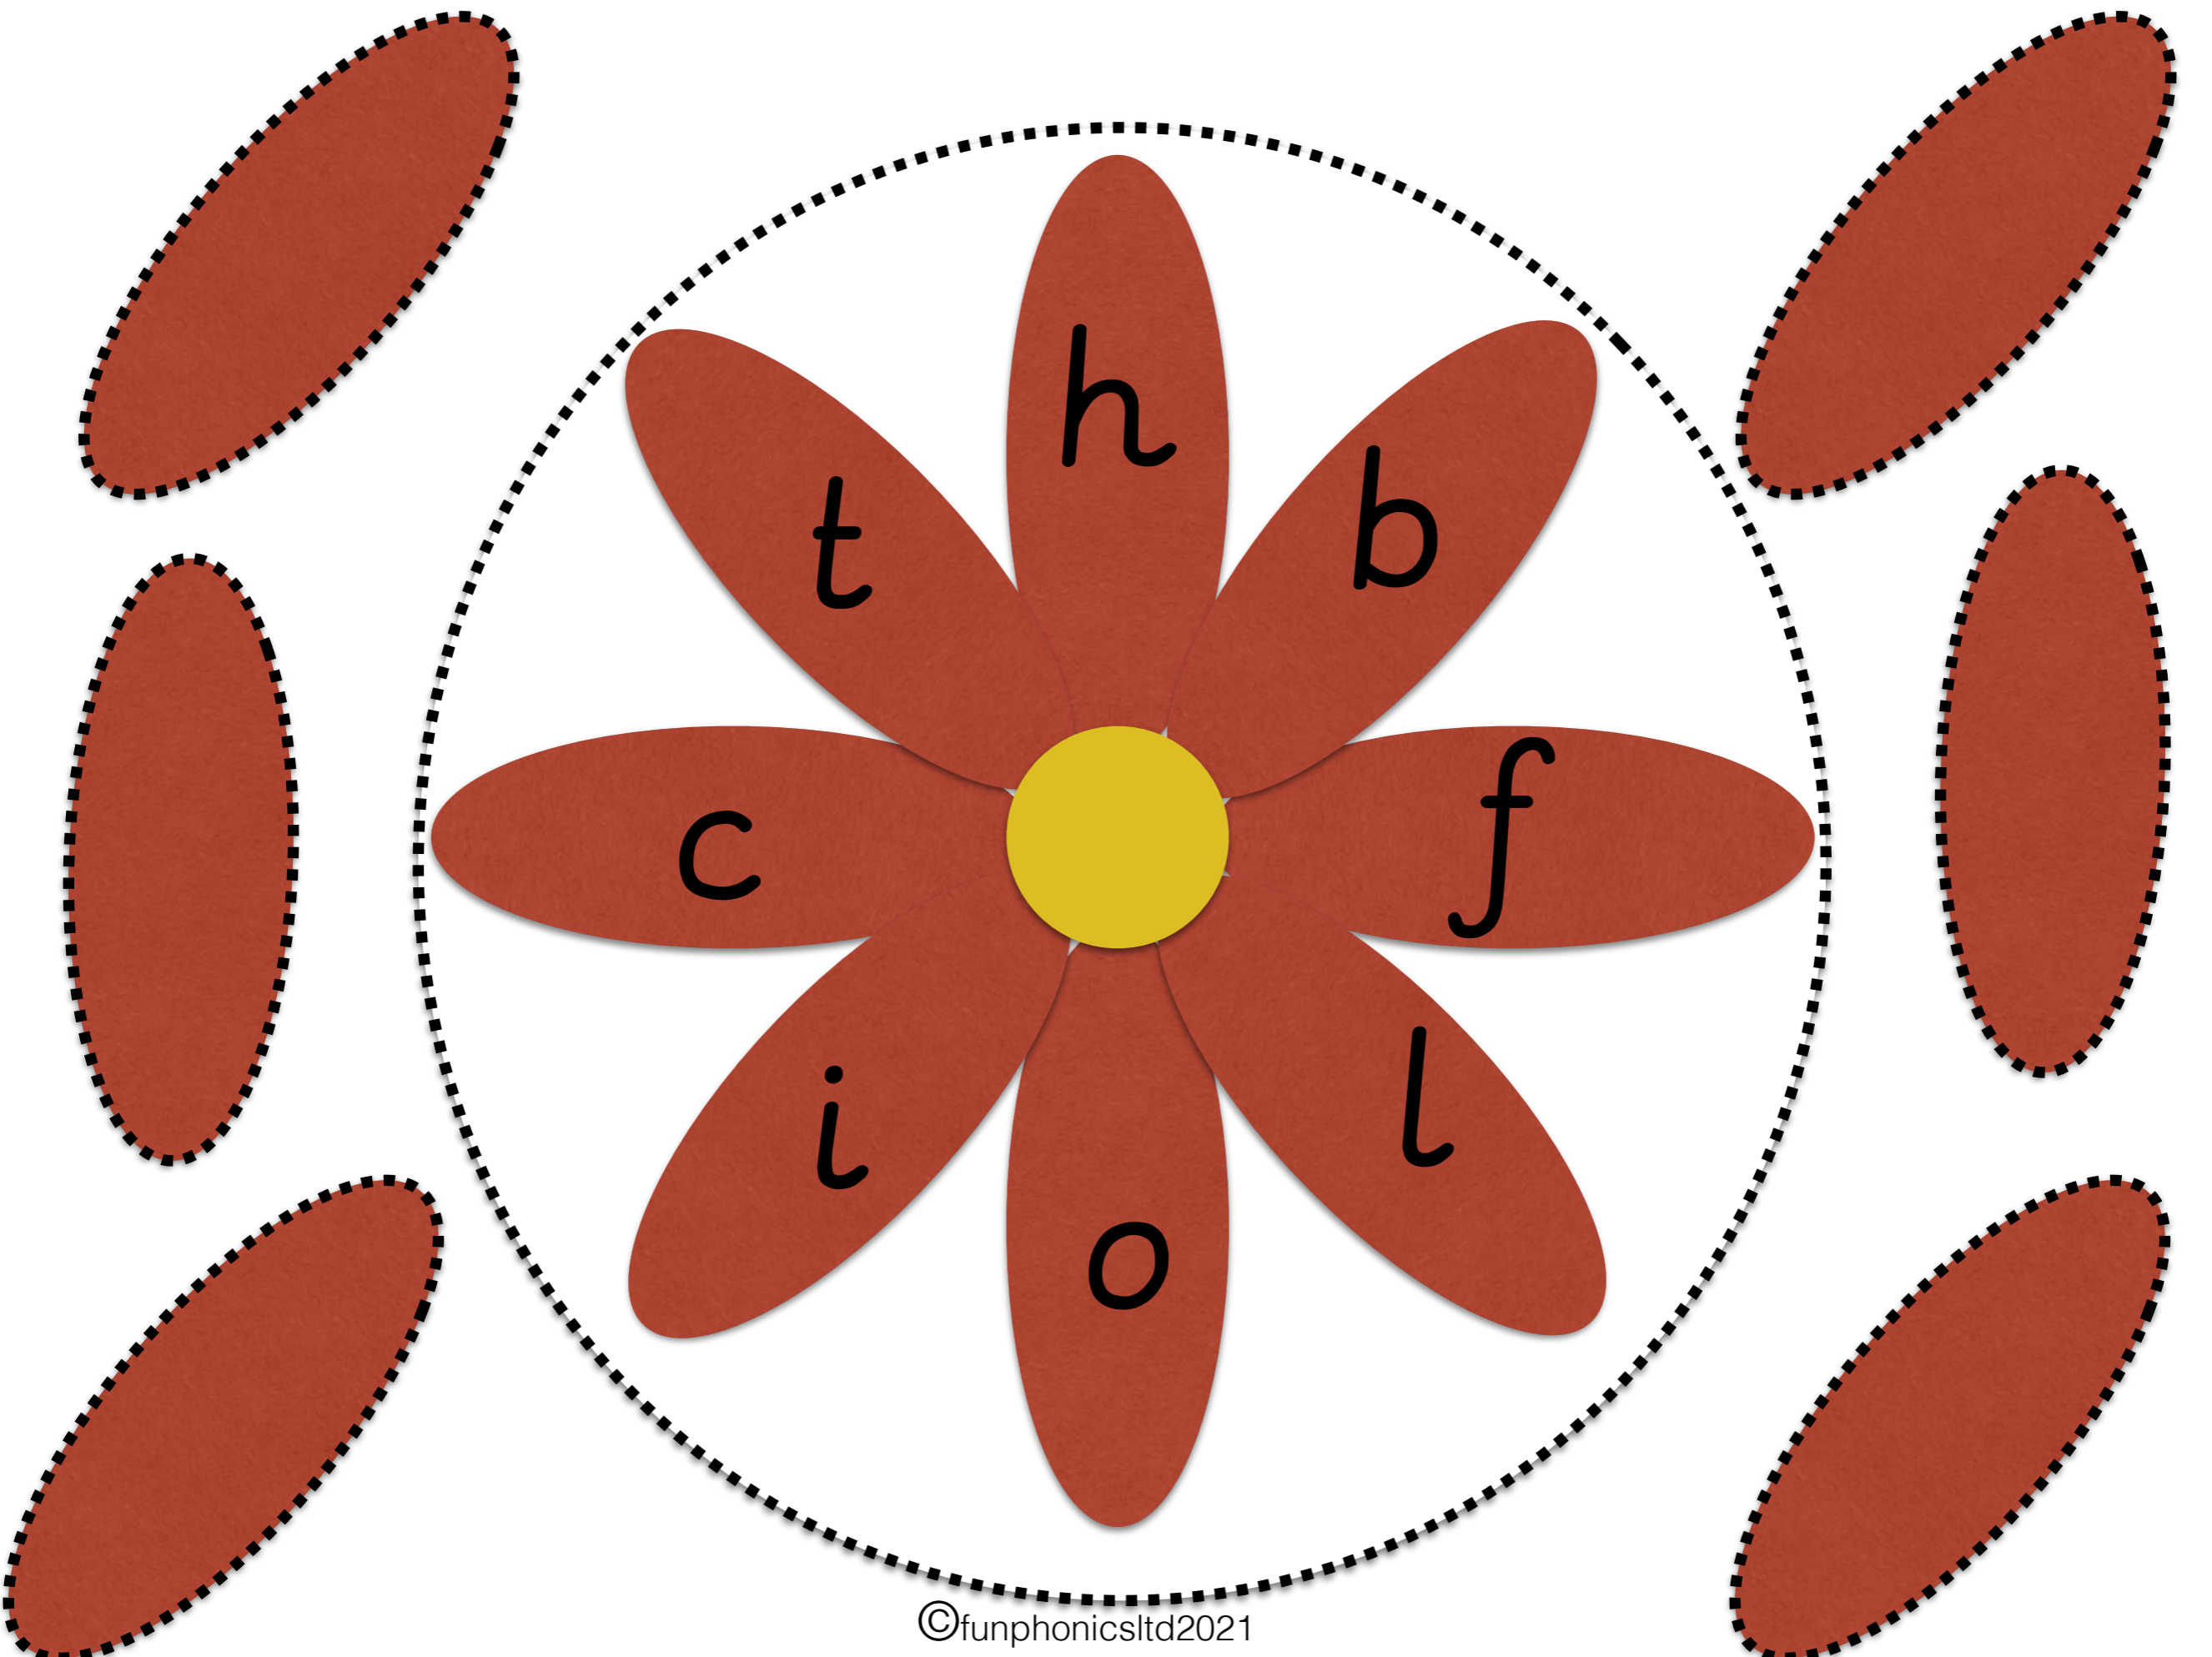

1. Cut out the game boards and petals
2. Each player can choose a phase appropriate game board.
3. They can then roll the corresponding coloured dice
4. If the grapheme on the dice matches any of the graphemes on their game board they can cover that sound with a petal
5. The winner is the player who covers all of the petals on their game board first

Please note that the yellow flowers are hardest to complete because to roll a split digraph you will need to roll the two vowels required.
